Mr. William C. Ward  
Land Redevelopment Co.  
1609 Bedford Road  
Wilmington, Delaware

Dear Mr. Ward:

Reference is made to our letter of October 10, 1969, pertaining to the wind fencing at the landfill.

I inspected the site today and it is apparent to me that the present installation will be completely inadequate for operation close to the Dupont Highway.

I suggest that you install a semi-permanent section of fence, approximately 500. ft. long and 15 ft. high, along Dupont Highway. This fence should be located about 75 ft.  $\pm$  inside of your property line. The movable fence should be used, as presently, close to the unloading area. Our permanent perimeter fence will then serve as a final barrier between the highway and the landfill operation.

*20' fence built*

We call to your attention the fact that we have to do everything possible to prevent interferences with the traffic on the highway.

Any accident caused by blowing papers would clearly be considered as negligence from the operator unless all reasonable precautions had been taken.

Please call us on this matter.

Thank you for your cooperation.

Very truly yours,

G. W. Dutcher  
Director
